

IN THE SPECIFICATION:

Please make the following changes as indicated below. Specifically, the specification has been amended to reflect the addition of new figure 2. The amendment to the text of current paragraph [00022] shall supersede the previous amendment to that paragraph made by a Preliminary Amendment received by the Patent Office on November 4, 2004.

I. On page 3 of the specification, please insert the following paragraph after current paragraph [00012]:

“Fig. 2 is a side view of an alternative embodiment of a tongue portion of the device of Fig. 1;”

On pages 4 and 5 of the specification, please amend paragraph [0022] as follows:

[00022] As indicated the assembly of the holder 180 into the groove frame sections 170a and 170b requires that the holder 180 edge 118, of the lower tongue portion 116 be inserted into the lower ~~grove~~ groove 190 and set onto the ~~lower~~ upper groove surface 140. However, the lower tongue portion 116 and corresponding edge 118 may be substantially rectangular in cross section or alternatively beveled or in a conical section (see Fig. 2) for ease of insertion. Likewise, the upper tongue portion 114 ~~435~~ and its edge may be substantially rectangular in cross section or alternatively beveled or in a conical section (see Fig.) for ease of insertion. To further assist in the ease of insertion, the vertical wall 115 may be substantially rectangular in cross section or alternatively beveled or in a conic section for ease of insertion.”
